REASONS FOR ALLOWANCE

1. These comments are made in addition to the remarks in Applicant's specification and arguments, concerning the manner in which the invention distinguishes from the art discussed therein. The Examiner notes that the prior art does not disclose or suggest the claimed combination including particularly a self-checkout system having a conveyor with an upstream loading end and a downstream processing end, the processing area positioned proximate to the downstream end, the processing area comprising a self-scanning area and a bagging area, a start sensor positioned near the upstream end of the conveyor, the conveyor transporting at least one item downstream toward the self-scanning processing area in response to the start sensor sensing the at least one item adjacent to the start sensor, the conveyor being stopped when the at least one item is no longer adjacent to the start sensor, and a user proximity sensor positioned at the self-scanning area, the user proximity sensor causing the conveyor to resume transporting the at least one item towards the downstream end of the conveyor in response to sensing a user, and a stop sensor positioned proximate the downstream end of the conveyor near the self-scanning area, the conveyor being stopped upon the at least one item being sensed by the stop sensor.

The prior art lacks this structure or anything equivalent to it.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
